

# RESPIRATORY MODULE UNLOCKING NEW POSSIBILITIES IN MOTION MANAGEMENT

Fully integrated contactless solution with simultaneous real-time monitoring in six degrees of freedom.

## EXPAND YOUR CLINICAL OPTIONS

- ✓ **Phase, Amplitude, and Backup Gating:** Achieve unprecedented control over respiratory motion with the ability to tailor treatments based on phase and amplitude. The backup gating feature ensures added safety in case of any unexpected variations.
- ✓ **Enhanced Patient Comfort:** No physical marker, block or belt needed – no physical distraction for patients, no skin deformation, no inaccurate block placement, nothing to clean and no tracking equipment for the user to set up.
- ✓ **Real-time Monitoring in 6 Degrees of Freedom:** Experience a new level of precision with continuous monitoring in six degrees of freedom—ensuring optimal treatment delivery.
- ✓ **Intelligent Integration:** Enhance the capabilities of AlignRT without compromising user experience.
