Dear Valued Customer,

Subject: Vision RT Offerings, Compatibility with Varian Products and OSMS Support

Varian and Vision RT are committed to a long-term cooperation, through Varian's Interoperability Program (VIP), to facilitate the continued interoperability of Vision RT's SGRT offerings with Varian's TrueBeam and C-Series systems, as both companies continue to develop their respective products over the next decade and beyond. Varian supports an open ecosystem that enables different vendors to interface with their products. Through Vision RT's VIP membership, Varian validates the interoperability of Vision RT's new product releases with Varian's treatment delivery systems for supported product combinations.

For current and future OSMS customers, Varian has subcontracted technical and clinical support to Vision RT's expert team of service engineers and clinical professionals. This will allow customers to continue to receive qualified upgrades, trainings and maintenance. Furthermore, customers who have a combination of AlignRT and OSMS systems in their clinic may configure their systems to utilize a common patient database.

Vision RT and Varian remain committed to the success of each and every customer through our cooperative relationship and are dedicated to supporting customers in our efforts to combat cancer through our respective technologies.

Sincerely,

Christopher A. Toth
President, Varian Medical Systems

Norman Smith
President and CEO, Vision RT
