

Guidance for **EVERY** step

CASE STUDY SPOTLIGHT

HIGH-VOLUME PROSTATE AND PELVIC RADIATION THERAPY WITH ALIGNRT®

OIS REPORTS™ MODULE

"AlignRT gives us not only time savings, but supply savings, staff savings, and then allows us to increase our throughput and provide a better quality of life for our patients and our staff."

Dr. Guy Jones
Radiation Oncologist, Oncology Nevada

ALIGNRT AND TIME SAVINGS

"With the patient volumes we treat every day, maintaining throughput is critical. AlignRT not only avoided increasing treatment times but delivered meaningful time savings and improved efficiency across our centers."

USING ALIGNRT FOR PROSTATE TREATMENTS

"Prostate cancer represents the majority of our treatment volume, and AlignRT has become an integral part of how we manage patient positioning, motion monitoring, and treatment efficiency across our pelvic treatment workflows."

OIS REPORTS MODULE FOR REIMBURSEMENT

"The ARIA integration has simplified our reimbursement workflow significantly. What was once a manual process is now automated, giving us the documentation needed to support reimbursement while reducing administrative burden on our staff."

TATTOO AND MARK-FREE TREATMENT FOR PATIENT SATISFACTION

"The ability to offer tattoo-free treatments has been a bigger benefit to patients than many people realize. Patients value avoiding permanent treatment marks, and we've found it contributes to a better overall treatment experience."
